PROJECTS

TECHVILLAGE | FLUTTER APP

- TechVillage, a mobile app focused on fostering local trade and community interaction..
- Empowered local businesses by providing a platform for targeted advertisement and promotion of their shops and services.
- Implemented convenient features for users to search and find local services like auto drivers and plumbers.
- Grant Notifications: Techvillage app allows Panchayat to send grant notifications directly to the local residents.

MEDITRACK | FLUTTER APP

- Meditrack, a user-friendly mobile app for finding nearby hospitals based on user location.
- Maps and location services to facilitate easy navigation to selected hospitals.
- Enhanced search functionality for filtering hospitals by specialty (e.g., oncologist).
- Included user reviews for informed decision-making.

LEAVEHIVE | FLUTTER APP

- Promoted a paperless approach to leave management, reducing the need for manual paperwork and contributing to environmental sustainability.
- Real-time tracking of leave application status, keeping users updated on progress.
- Enabled document upload for supporting leave applications, ensuring transparency and authenticity.
- User-friendly interface for seamless navigation and convenient application submission.
